Passionate Frontend Developer with a keen eye for detail and a creative approach to solving complex problems. Expert in translating design concepts into responsive and user-friendly interfaces. Dedicated professional committed to staying abreast of emerging technologies and industry trends.

Skills

- **Frontend**: JavaScript, TypeScript, React.js, TailwindCSS, Bootstrap.
- **Backend**: Node.js, Relational database(PostgreSQL), Rest API.
- **Otros**: SCRUM, Git, Github.

Projects

GameNest - Gaming Backlog   Github Repository

- Currently developing a service that will provide a way to find games, save them to a collection, track them, read/create game reviews you've played, and more. In it, I'm applying best practices, user authentication, email validation, testing, among others.
- <u>Technolgies used</u>: **React.js, TypeScript, Node.js, JWT, Express, PostgreSQL, TailwindCSS**.

DonC Alojamientos   Github Repository

- I designed a service for booking houses, hotels, etc. In it, I utilized techniques to allow users to book a service and even publish their own service.
- <u>Technolgies used</u>: **React.js, Node.js, JWT, Express, PostgreSQL, TailwindCSS.**

Dawson E-Commerce   Repositorio Github

- I participated in a team to develop an E-Commerce platform using the SCRUM methodology. We implemented features to view product details, add them to a shopping cart, among other functionalities.
- <u>Technolgies used</u>: **HTML, CSS, JavaScript, LocalStorage, Bootstrap.**

Education

Universidad Tecnológica Nacional - Tecnicatura Universitaria en Programación   **March 2022 - December 2023**

- A career where I learned application development, problem-solving, and teamwork skills.

Rolling Code School - FullStack Developer   **June 2023 - February 2024**

- Course for web development with a strong emphasis on teamwork (SCRUM).
